Every brand has one bottleneck. Find it first.

A river only flows as fast as its narrowest point.

01

Spot it

Where does work pool up and wait?

02

Compress it

Cut the steps and information it needs to pass through.

03

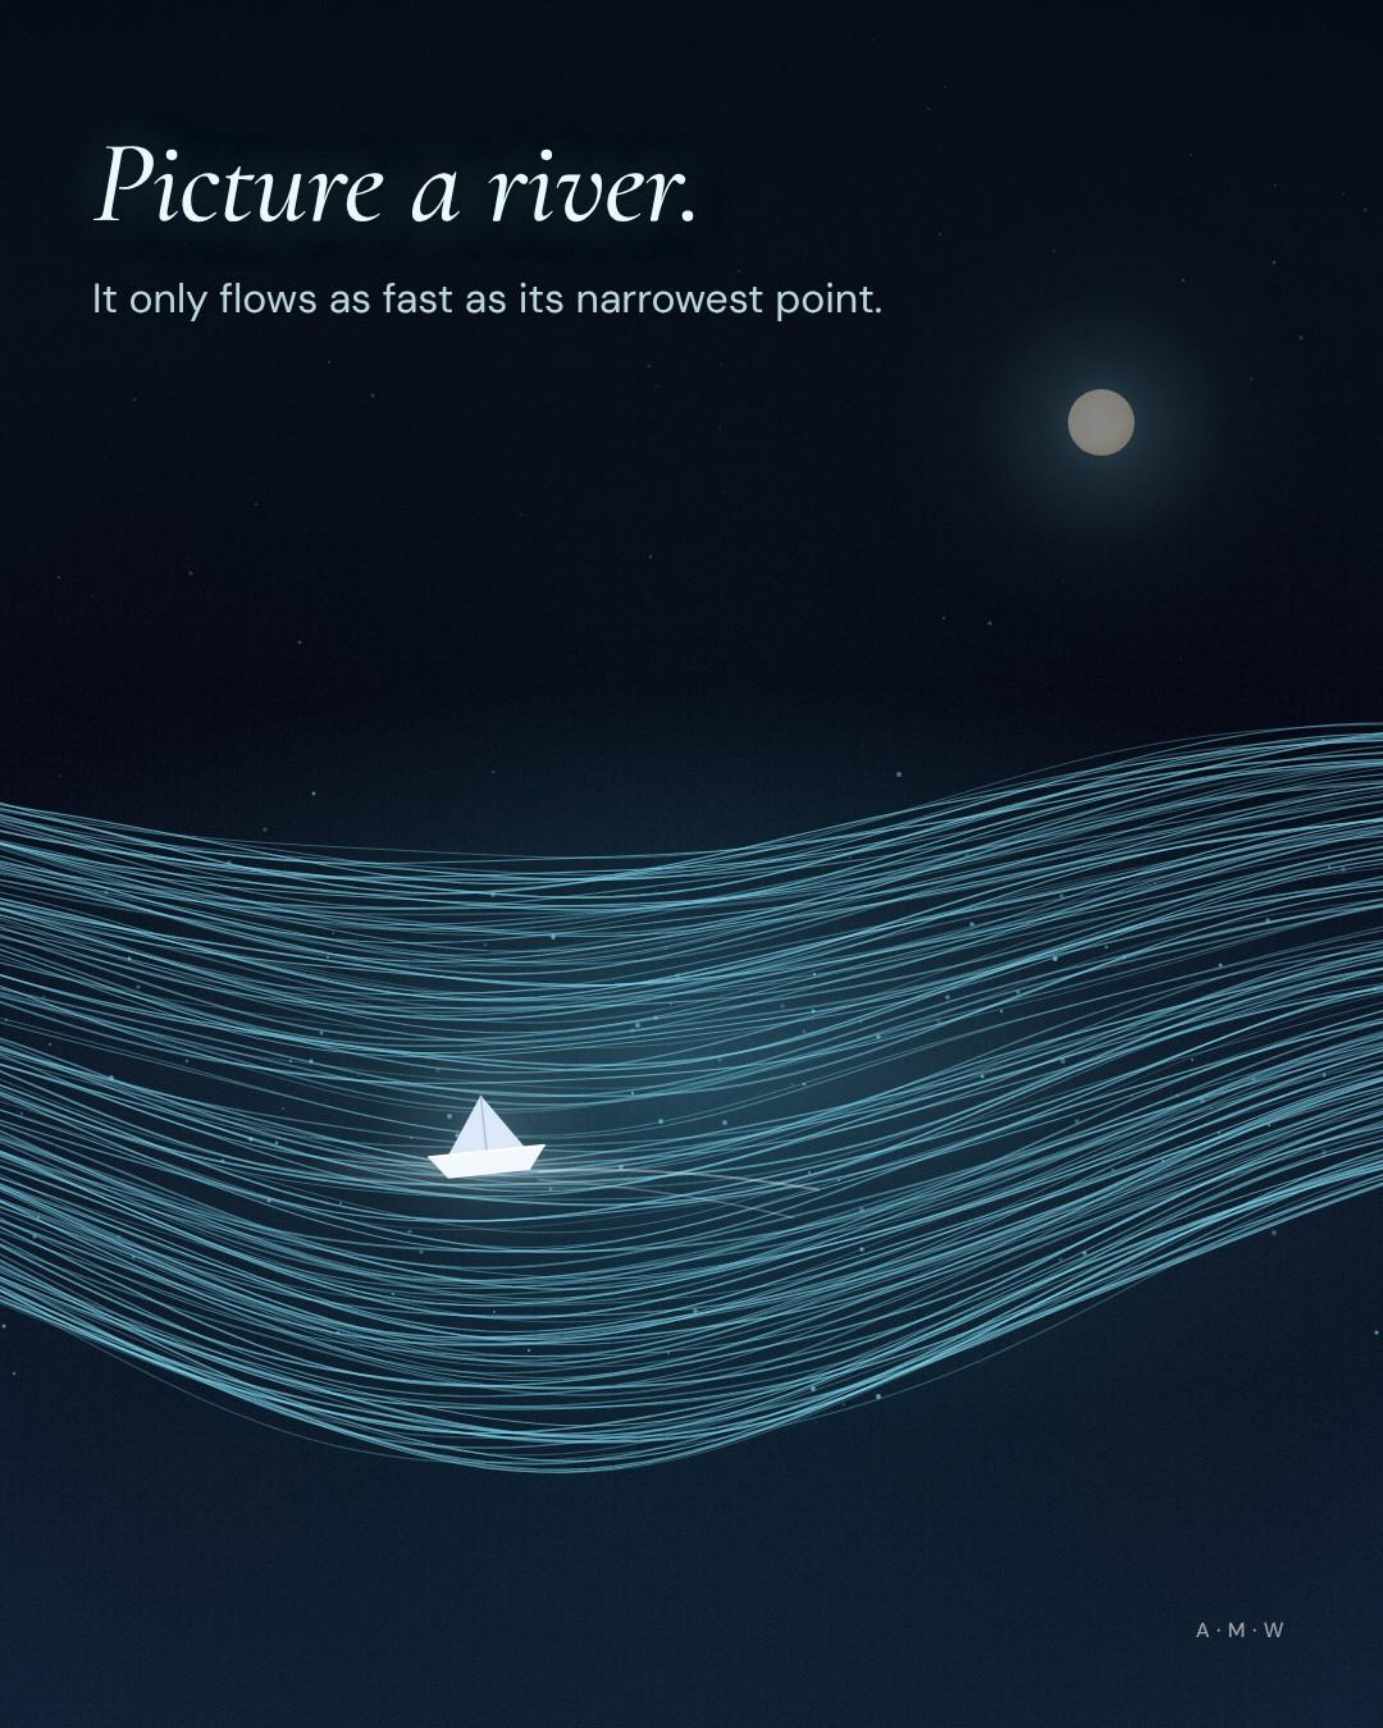

Move faster

Fix the narrows before widening the rest.

Picture a river.

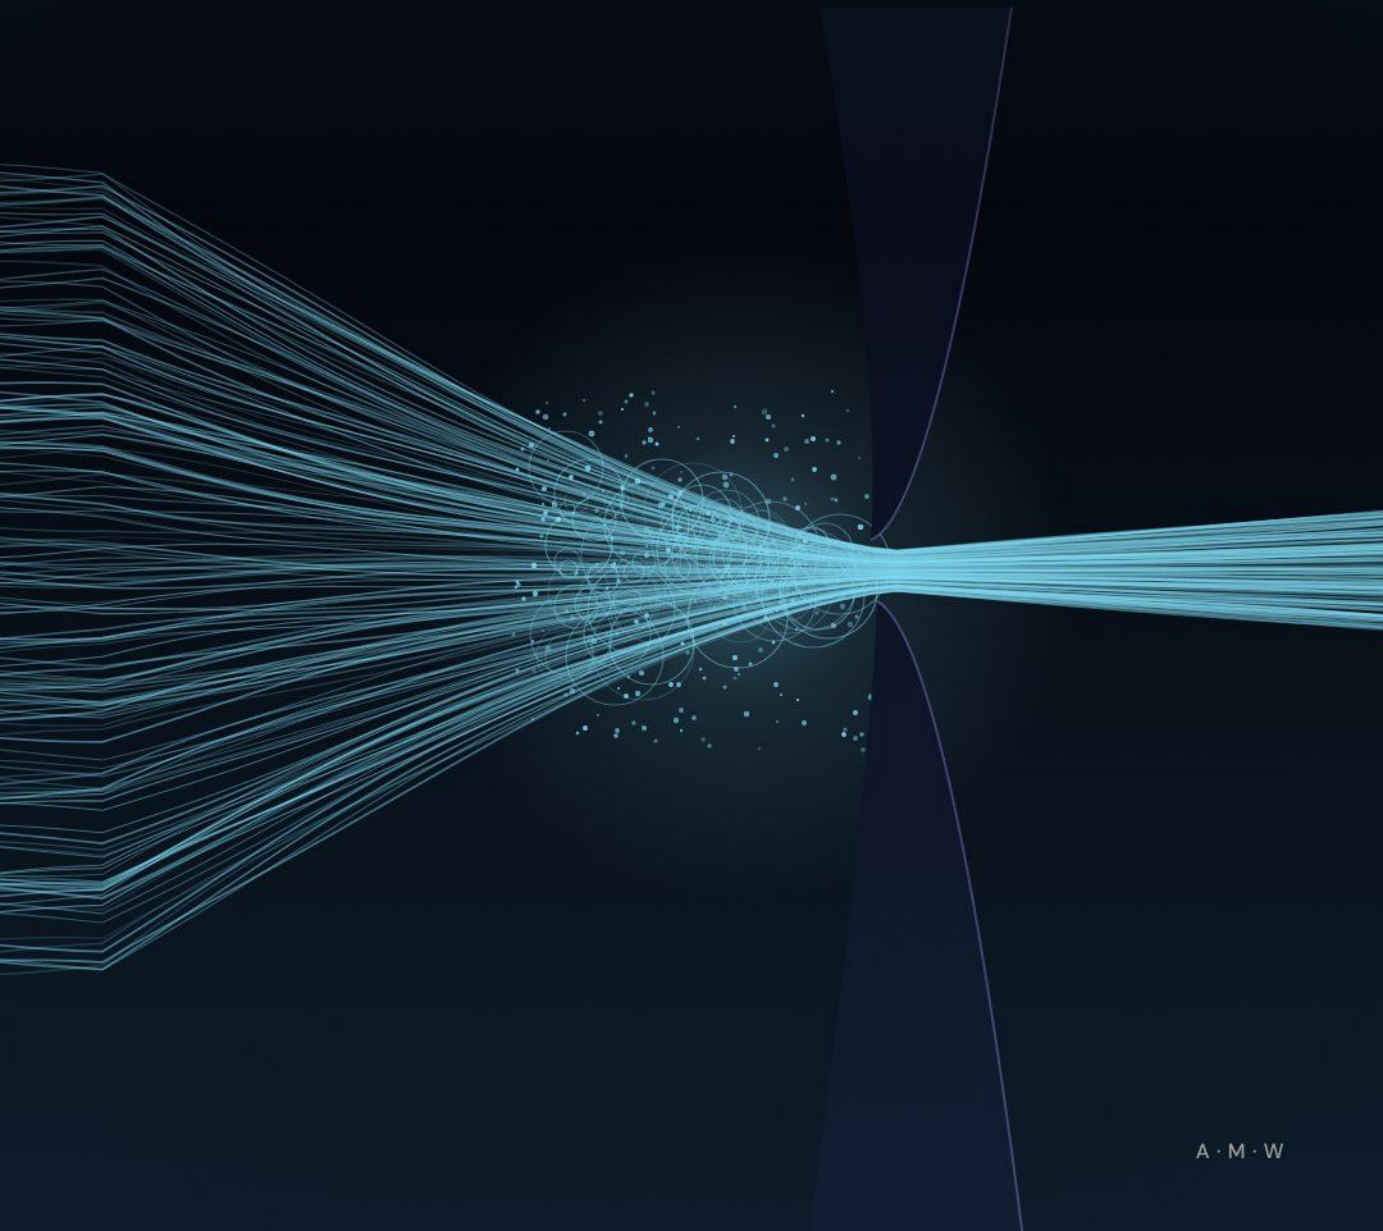

It only flows as fast as its narrowest point.

A · M · W

Find the narrows.

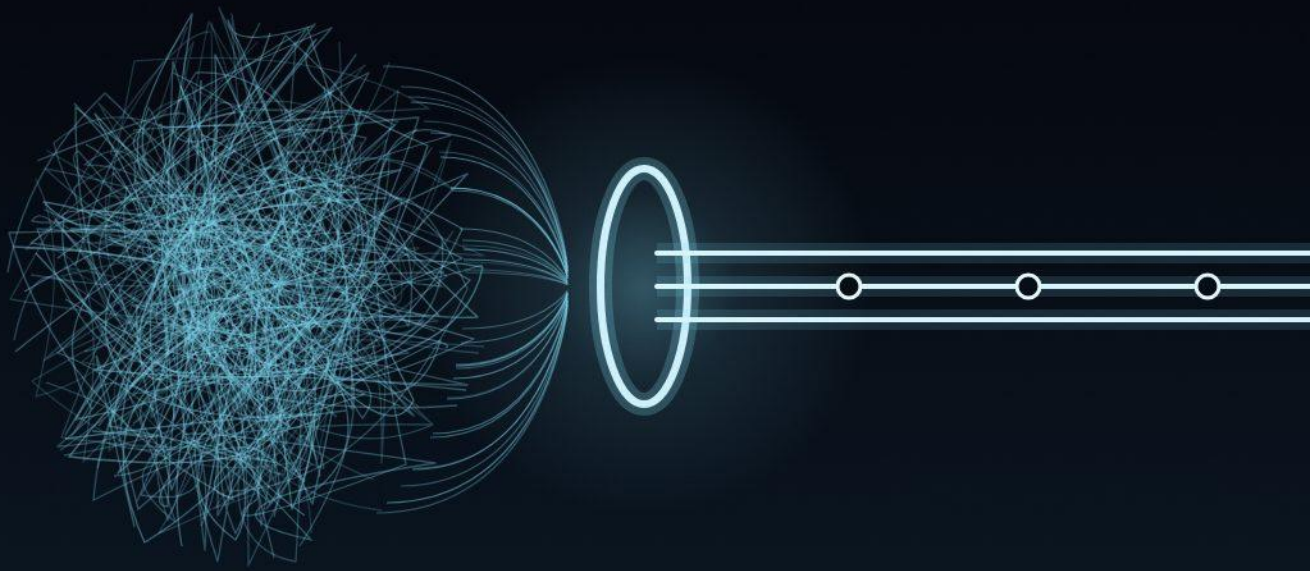

Where does work pile up and wait?

A · M · W

Compress it.

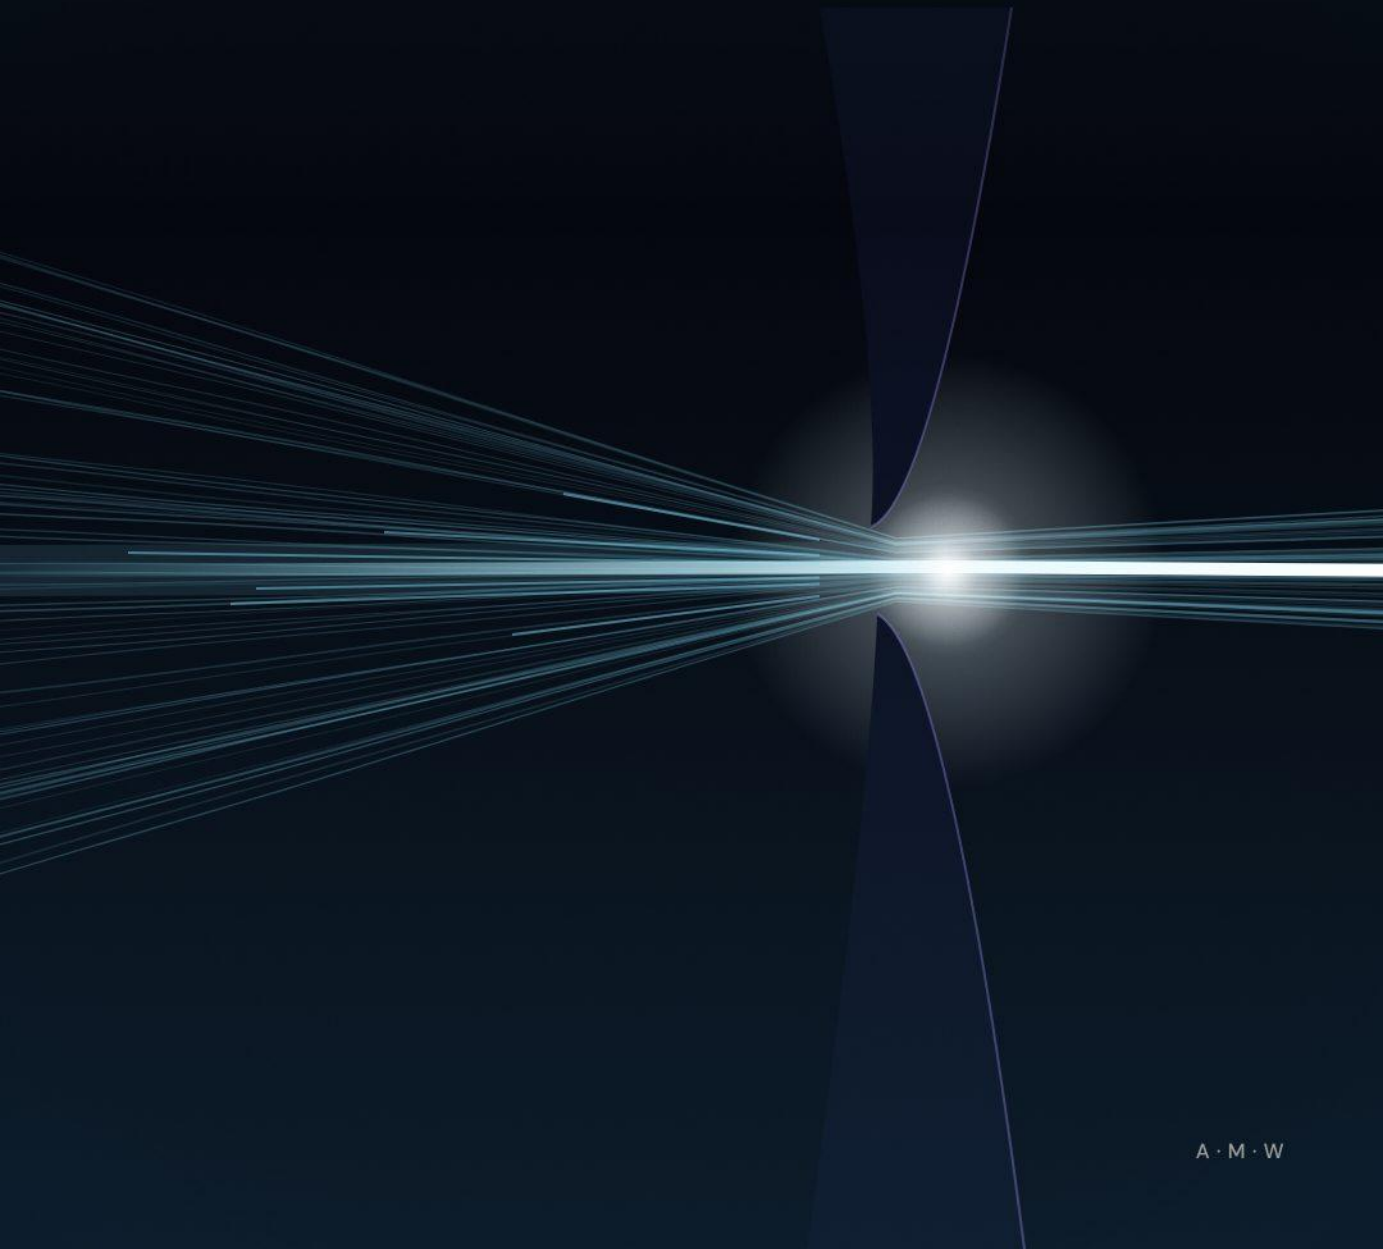

Cut it down to what matters.
Make the next step obvious.

A · M · W

Move fast at it.

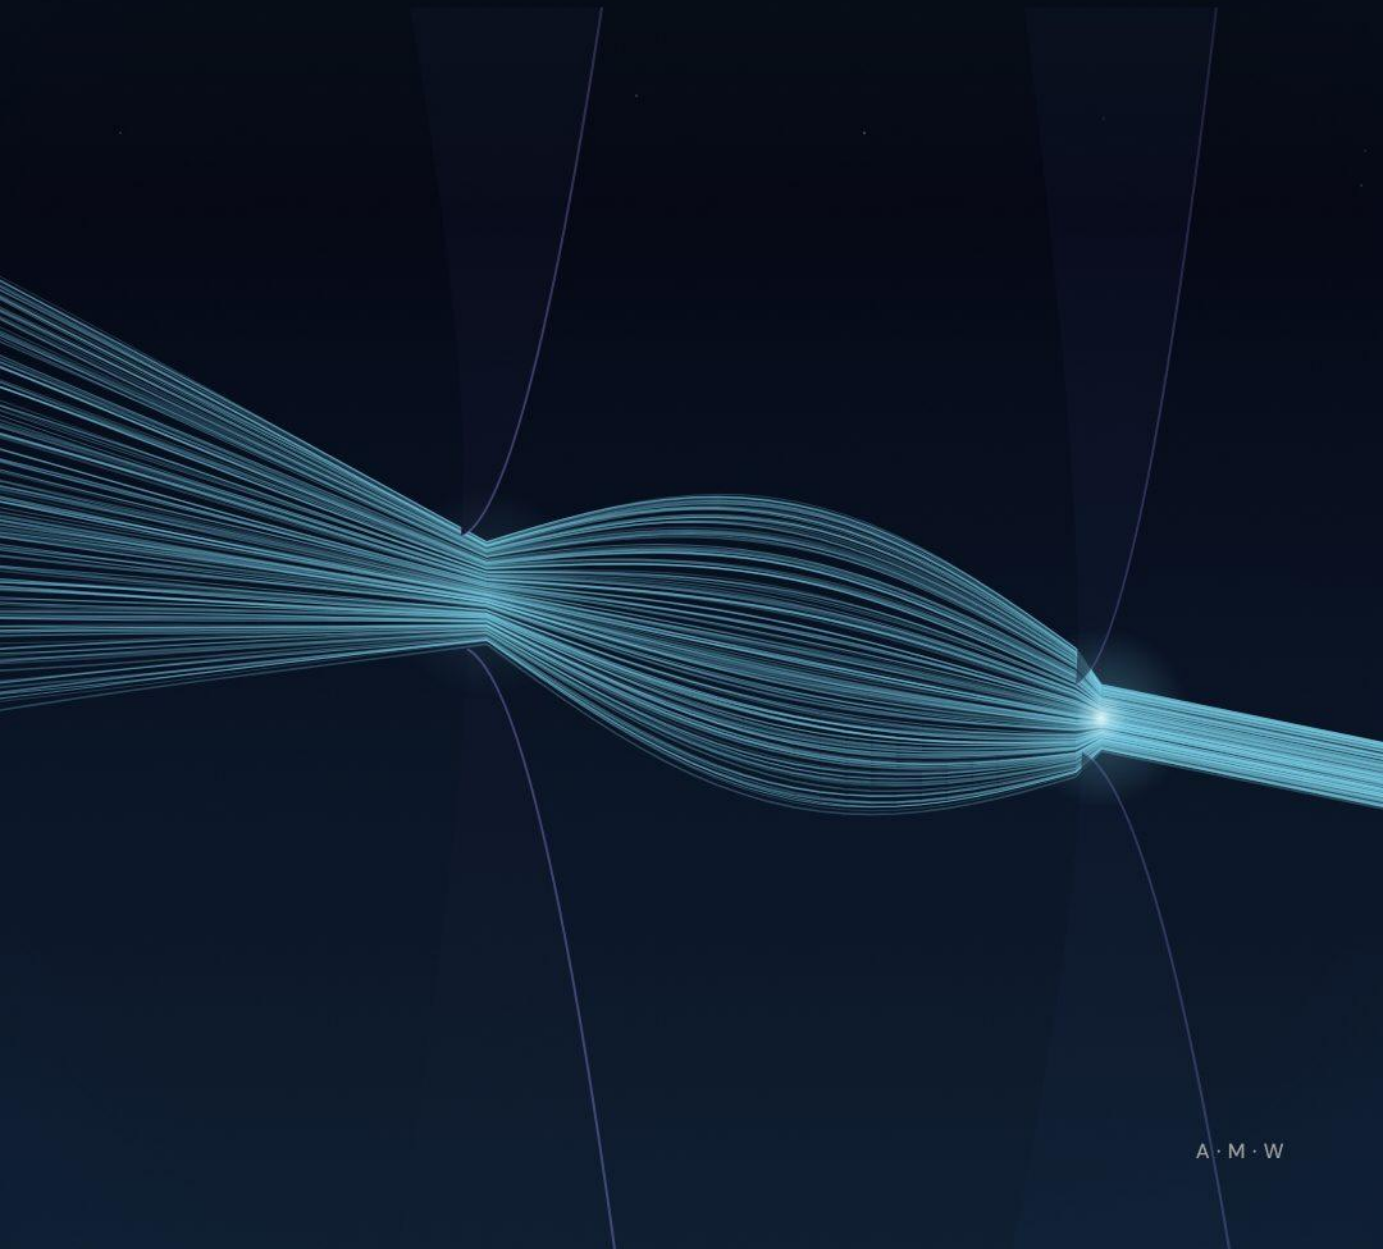

Aim your speed at the narrows, not everywhere.

A · M · W

Then find the next one.

Make the narrow spot smaller, then move fast at it. That's the recipe, every time.
